PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building web applications and enterprise products with React, Next.js and TypeScript. Background spanning software consulting, e-commerce and long-term product development. Experienced translating business requirements into maintainable interfaces while collaborating with Product Owners, Functional Analysts and backend engineers. Hands-on experience with REST, GraphQL, Redux Toolkit and cloud-based delivery environments.

PROFESSIONAL EXPERIENCE

- Frontend Engineer - Errepar S.A.

Jan 2025 - Present

MiEstudio: enterprise platform for Argentine accounting firms to manage collaborators, clients, tax declarations and legal workflows connected with ARCA services.

 - Design and deliver product features using React, Next.js and TypeScript.
 - Build reusable UI components with Material UI and Tailwind CSS, supporting consistency across product modules.
 - Integrate REST services that support accounting, tax and legal workflows.
 - Collaborate with Product Owners and Functional Analysts on technical decisions, screen design and UX improvements.
 - Work within an ecosystem using PostgreSQL, MongoDB, AWS configuration variables and Argo CD deployment workflows.
 - Contribute to Docker-based development and CI/CD processes at a practical working level.
- Full Stack Developer - Latech Digital Services

Jun 2021 - Dec 2024

Software factory delivering custom solutions across legal services, real estate, e-commerce and corporate websites, including projects such as Marusia and TuAlmacen.

 - Developed frontend applications with React and Next.js for projects across multiple industries.
 - Built backend services and APIs using Node.js, Express, Java and Spring Boot.
 - Implemented GraphQL integrations for e-commerce solutions and REST APIs for business applications.
 - Managed application state with Redux Toolkit and reusable React Hooks.
 - Collaborated with clients, designers and development teams throughout planning, implementation and delivery.
